

# Water Reuse and Resource Recovery

## In Canada

### Quarterly Project Update

Sixth Edition

January 2020

#### Last call for contribution

We are asking for your thoughts on water reuse and resource recovery. If you have not already, please contribute and share with anyone who might be interested.

<https://reusewater.ethelo.net/page/welcome>

Note our final deadline is January 31. Thank you!

#### Workshops in Okotoks

In partnership with the Town of Okotoks we hosted two workshops, one with professionals and one with the public, from Okotoks and surrounding municipalities.

One idea we heard from the professionals:

- Regional collaboration is needed to foster change and advocate for adequate, supportive regulations.

One idea we heard from the public:

- Promote understanding and support for water reuse through education for the public and in schools.

#### Who we are

We are a team of researchers and interested parties led through the School of Public Health at the University of Alberta in association with provincial and federal water agencies

#### Our vision

Understand emerging science issues and use social engagement to understand what is technically possible and socially acceptable for water reuse in Canada

#### Interested?

Please contact us if you are interested in working with us

### Thank you

Thank you for your readership and support of our work. We are developing outcomes that will be prepared for feedback starting this April. Stayed tuned!
