

Water Reuse and Resource Recovery In Canada

Quarterly Project Update

Final Edition

December 2020

Research Outcomes

We have some exciting outcomes to share, including

- A resource for the entire water community: The Community Water and Resource Recovery Implementation Roadmap reusewater.ca/wp-content/uploads/2020/12/WRR-Roadmap-1.pdf
- An article on our workshops conducted with practitioners such as many of you: *Building the case for water and resource recovery in Canada: practitioners' perspectives* (in publication process with IWA Water Policy)
- An article on interviews with experienced water reuse professionals: *Improving the implementation of water and resource recovery in Canada* (under review)

New video!

A final thank you

We want to express our gratitude to everyone who contributed to our work. As we look forward to improvements in WRR, we reflect on the hard work already being done. Thank you for your readership and commitment to WRR. Best wishes in 2021!

Who we are

We are a team of researchers and interested parties led through the School of Public Health at the University of Alberta in association with provincial and federal water agencies

Our vision

Understand emerging science issues and use social engagement to understand what is technically possible and socially acceptable for water reuse in Canada
